OBJECTIVE

Motivated AIML Undergraduate and aspiring software engineer with hands-on experience building full-stack web applications. Dedicated to developing intelligent solutions and strengthening problem-solving skills through Data Structures and Algorithms in Java.

EDUCATION

Bachelor of Engineering in Artificial Intelligence and Machine Learning	2023 – 2027
<i>Sir M. Visvesvaraya Institute of Technology (Sir MVIT)</i>	<i>CGPA: 8.88 / 10</i>

SKILLS

Languages: Java (DSA), JavaScript (ES6+), Python (Basics)
Frontend: React 18, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, EJS
Backend: Node.js, Express.js, Socket.IO, WebRTC
Database: MongoDB, MySQL
AI & APIs: Google Gemini 2.5 Flash, Web Speech API, Mapbox Geocoding API
Tools: Git, GitHub, Postman, Render, Vercel
Concepts: MVC Architecture, REST APIs, Authentication, WebSockets, Peer-to-Peer Networking

PROJECTS

Nexus — AI-Integrated Video Conferencing Platform | [Live Demo](#) | [GitHub](#)

- Engineered a real-time video conferencing application using the **MERN stack** and **WebRTC** for high-quality, low-latency peer-to-peer streaming.
- Developed interactive features including live chat via **Socket.IO** and automated live captions utilizing the browser-native Web Speech API.
- Integrated **Google Gemini 2.5 Flash** to summarize live audio transcripts into structured Markdown recaps, utilizing MongoDB for efficient session history retrieval.
- Managed full-stack deployment on **Render** with environment-driven configuration and secure secrets management.

Nestora — Full-Stack Accommodation Booking Platform | [Live Demo](#) | [GitHub](#)

- Developed a comprehensive property listing platform following **MVC architecture** using Node.js, Express.js, and MongoDB.
- Implemented secure user authentication and authorization using Passport.js.
- Integrated **Mapbox Geocoding API** for location mapping and used Cloudinary for scalable image storage.
- Applied server-side rendering (EJS) and RESTful routing to improve performance and navigation.

ACHIEVEMENTS

2nd Runner-Up, Hackfest (National Level Hackathon) — NMAMIT: Secured 3rd place in a 36-hour national-level competition by developing an automated software solution for complex document processing and risk analysis — recognized among the top submissions for technical depth and real-world applicability

CERTIFICATIONS

- Full Stack Web Development — Apna College
- Oracle Cloud Infrastructure AI Foundations Associate
